Dear Friends:

As December marks World AIDS Day and the winter solstice, this month’s historical features focus on both HIV/AIDS and the sun.

Noted Elsewhere: “Fauci”

Often in the news because of COVID, Dr. Anthony Fauci became director of the National Institute of Allergy and Infectious Diseases during another major disease outbreak: AIDS. National Geographic highlights both pandemics in its documentary “Fauci,” released in September and streaming on Disney+. As the year turns, let’s continue to be cautious and take heart in better times ahead.

As a reminder, we are once again open to readers and classes by appointment. All visitors must show proof of vaccination against COVID-19 and will need to be masked and socially distanced. For details, see our guide to visiting the Library. For more ways to connect with our resources and services, check out the Quick Connections page.

The NYAM Library Team

NYAM’s work to ensure health for all is more critical than ever. Your support helps us preserve the Library’s treasures, share them with researchers and the public, and safeguard the history of medicine to inform the future of health.
