NYAM IN ACTION
Highlights From Our Digital Annual Report

The New York Academy of Medicine (NYAM) is a leading voice for innovation in the public’s health. We invite you to learn more about our 175th anniversary and highlights of our work from our 2022 digital annual report NYAM in Action.

ABOUT NYAM & OUR HISTORY
As the original bold thinkers and innovators for health in New York City, The New York Academy of Medicine (NYAM) has been a leading voice for public health since 1847. Throughout its history, NYAM has uniquely championed innovative changes to the systems that perpetuate health inequities and keep all communities from achieving good health. Today, this work includes original research, programs, and policy initiatives that distinctively value community input for maximum impact. Combined with NYAM’s trusted programming and historic library, and with the support of its 2,000 esteemed Fellows and Members, NYAM’s impact as a public health leader continues.

“Congratulations to The New York Academy of Medicine for 175 years of advancing the holistic health of our city and everyone within it. From the young to the young at heart, NYAM has focused on a data-driven, community-informed approach to inform our public health community and drive change. This work is at the heart of my vision as mayor, and I look forward to continued partnership with NYAM to make that vision a reality.”
— Mayor Eric Adams

A BOLD NEW NYAM
Under the leadership of President Ann Kurth, PhD, CNM, MPH, we renew our commitment to address the root causes of health inequities and work to influence systemic change for everyone to lead a healthy life.

“My focus is on purpose-driven work to move the needle for health, and NYAM provides a wonderful platform for that, here in the city that we love.”
— NYAM President Dr. Ann Kurth

LEADING THE WAY FORWARD
In keeping with our legacy as an innovator in public health, NYAM continues to be at the forefront of addressing the critical issues of the day. In 2023, we embarked on an expanded imperative—to address the impact of climate change on our healthcare and public health systems and communities.

Around the Table With Climate & Health Champions
Our popular virtual event series returns with a renewed mandate—to demonstrate the connection between the climate crisis and health. The series provides tools and educates, inspires, and engages audiences to take action on what has been called the greatest public health threat in history.

Resilience Convening
In 2024, NYAM will convene stakeholders to reimagine our health systems, to support health workers, and to facilitate community recovery from the COVID pandemic, while preparing for the next crisis—whether another novel pathogen, superstorm, or deadly heat wave.

LEADING THE WAY FORWARD
INNOVATING FOR THE FUTURE

GENERATING KNOWLEDGE
Quantitative, qualitative & community-engaged research
Program evaluation
Community health needs assessment
Technical assistance & training
Policy analysis & testimony

CHANGING SYSTEMS
Maternal & child health
Healthy aging
Harm reduction
COVID-19 equitable practices

ENGAGING THE PUBLIC
Elevating Community voices
Around the Table Series
Then & Now Series
Fellows & Member Events
Library Events
Clinical Meetings & Symposia
RESEARCH AT NYAM
As the original bold thinkers in public health, in 1847, the founding Fellows began a long-standing legacy of introducing innovative data-driven solutions to improving health. This work continues today, with a focus on social, environmental, and institutional factors that influence health from safe birth through healthy aging.

Amplifying community voices has long been at the core of NYAM’s work. Our enduring practice of community consultation and integration of those with lived experience informs our work to advance health equity across the lifespan. NYAM’s research is community-partnered and includes program evaluation, community health needs assessment, and policy analysis. NYAM also provides technical assistance and training.

NYAM researchers collaborate with academic institutions, government agencies, and community-based organizations to understand and improve community public health.

CHA - Center For Healthy Aging

USING OUR VOICE FOR GOOD
Since its founding, NYAM has stood up in support of evidence-based public health solutions and we continue this legacy today while also addressing historical wrongs in our own history.

A TRUSTED SOURCE
A trusted source for information, resources, and actionable recommendations, NYAM hosts educational events each year that reach thousands of participants on critical health issues of the day. Special events include our Anniversary Discourse & Annual Meeting of the Fellows & Members, awards programs, annual gala, Celebration of the Library, and more. NYAM is home to one of the most significant historical libraries in medicine and public health in the world. The Library supports and encourages a deeper understanding of the many forces that have shaped health from ancient times to the present day. Through its work with scholars and the general public, we encourage exploration of history to better understand current day issues.

FELLOWS, MEMBERS & OUR PROFESSIONAL NETWORK
The NYAM community is comprised of a dedicated and talented group of health and public health professionals and advocates. NYAM’s Fellows and Members are top practitioners, academics, researchers and policy makers in fields spanning medicine, nursing, social work, public health, administration, health policy, pharmacy, dentistry, law, and government.

SUPPORTING NYAM
Our work would not be possible without the generosity of our supporters—a network of individuals, foundations and corporations who share our commitment to building a healthier and more equitable society.
